PROJECTS

CLOTHING APPLICATION

March 6 - 14

- Used Node.js, MongoDB, and Express to create the REST API
- Connect React Project with the Back End with the help of Axios for Http Requests
- Designed the UI with Adobe XD
- Used different React Libraries to improve UX

SHELTER APPLICATION

April 3 - 11

- Used Petfinder API for data
- Designed UI in Adobe XD
- Improved UX with the help of third-party libraries such as Font Awesome for React, and React-Router
- Used Github Pages for hosting

MOVIES APPLICATION

Nov 12 - 15

- Used the MovieDB public REST API
- Responsive design makes for effortless navigation across all platforms
- Used React for the Front End
- SCSS for styling
- SPA with React Router
- Axios for Http Requests
